Some of the projects include kruzhok.project.tinkoff.ru (backend, frontend for admins), loud-fans.project.tinkoff.ru (backend), hungrymiles.project.tinkoff.ru (backend, deployment), grants.project.tinkoff.ru (frontend for admins).

Kaspersky Lab

Software Developer Mar. 2018 – Mar. 2021

Started as an internship and turned into a full time position. Participated in two projects:

React-based content editor

This content editor is used for content creation which is deployed on kaspersky.com website.

- Documentation, refactoring, testing components creation, UI, data handling of legacy code.
- Participated in rewrite of project - created various critical components like inbound and outbound data validation using JSON Schema and data migration tool.

Partner Portal

Development and support of partners.kaspersky.com website.

- Supported legacy code and took part in migration to a new platform - MVP was built under 3 months.
- Created various components for portal with advanced business logic using HTML, JavaScript and CSS which are used on day-to-day basis by customers.

Projects
