Experience

Bolt

Senior Software Engineer   Aug. 2022 - Now

Managing and supporting critical systems within Bolt's partner program aimed at B2B, scaling to enterprise levels. Contributing to the migration of the Fleet Portal, main customer-facing product for partner program, to a modern technology stack, as well as leading and shipping various high-impact projects, ensuring scalability, performance, and smooth integration with the microservice architecture.

Tinkoff Bank

Senior Software Engineer   Mar. 2021 - Apr. 2022

Working in team creating small 2-4 months long projects (project.tinkoff.ru). Responsible for documentation, frontend, backend, deployment of several projects, internal packages and templates.
Some of the projects: kruzhok.project.tinkoff.ru, grants.project.tinkoff.ru, loud-fans.project.tinkoff.ru, hungrymiles.project.tinkoff.ru (frontend, frontend for admins, backend, deployment).

Kaspersky Lab

Software Engineer   Mar. 2018 – Mar. 2021

Started as an internship and turned into a full time position. Participated in two projects:

React-based content editor

This content editor is used for content creation which is deployed on kaspersky.com website.
- Documentation, refactoring, testing components creation, UI, data handling of legacy code.
- Participated in rewrite of project - created various critical components like inbound and outbound data validation using JSON Schema and data migration tool.

Partner Portal

Development and support of partners.kaspersky.com website.
- Supported legacy code, took part in migration to a new platform - MVP was built under 3 months.
- Created various components for portal with advanced business logic using HTML, JavaScript and CSS which are used on day-to-day basis by customers.

Projects

shortify (Website, Github)

Fullstack (Express/React) link shortener app deployed on Google Cloud. Server-side session management, MongoDB as database, Email/password or Google OAuth 2.0 authentication.

rxmask.js (Playground, Github, npmjs)

Advanced input mask package published on npmjs. HTML embeddable. Allows to specify format for every character.

Weather Mood Radio (Playground, Github)

Radio that picks Lo-Fi tracks from SoundCloud according to current weather, day time and season at your geolocation.

Skills

- Typescript, Javascript

Backend
- Node.js
- NestJS, Express
- PostgreSQL
- Docker

Frontend
- React, Redux
- HTML5, CSS3, SASS

Testing
- Jest
- Cypress, Puppeteer

Education

Bachelor's degree in Information Systems Security
MAI, Sep. 2014 – Jun. 2018

Master's degree in Infocommunication Technologies
MAI, Sep. 2018 – Jun. 2020
